

# WORKSHOPS FOR PHDS & POSTDOCS

EMPOWERING DOCTORAL CANDIDATES AND POSTDOCS TO EXPLORE THEIR ENTREPRENEURIAL POTENTIAL AND DRIVE CULTURAL CHANGE TOWARDS INNOVATION AND ENTREPRENEURSHIP IN ACADEMIA.

## What we do

YES offers a unique opportunity for researchers, training and connecting them with startup concepts and fostering interdisciplinary collaboration. Through engaging workshops and interactive sessions, YES playfully instills creative methods and an entrepreneurial mindset, empowering participants to explore entrepreneurial opportunities.

## How we do it

- Varied workshop formats for growing entrepreneurship skills
- Nationwide network facilitating interdisciplinary collaboration and knowledge transfer
- Professional design and high-quality events enhancing participant experience
- Focus on long-term impact and sustainability, with a niche focus on Sciencepreneurship
- English-language offerings to reach a diverse audience of scientists and researchers

## For whom

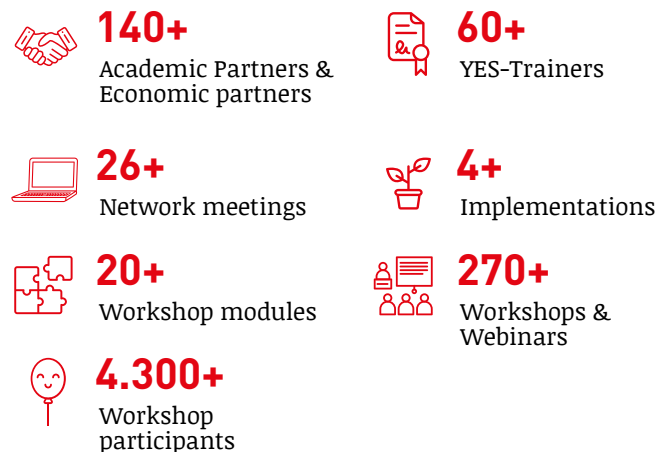

Young Entrepreneurs in Science strengthens the networking between universities, research institutes, and corporations. Our program partners can position themselves as leaders of innovation as well as promote career perspectives to highly qualified specialists in their region. With our unique and high skilled community, they can facilitate knowledge transfer in various levels. Additionally, we offer a train-the-trainer-program and “Young Entrepreneurs in Science Campus Certificate” for their outstanding commitment to our common objective.

## What we value

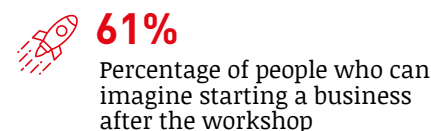

Every year in Germany, 30.000 highly-qualified researchers complete their doctorates, yet the academic environment often lacks a culture of entrepreneurship. There is a need to bridge the gap between academic expertise and entrepreneurship skills, fostering a mindset shift towards innovation and initiative.
